

1 SHAMPOO BOWL ASSEMBLY AND SHAMPOO BOWL CUSHION

2

3 ABSTRACT

4

5 A cushioning device for use with a shampoo bowl
6 including a front wall having an inner surface and an outer
7 surface, and a U-shaped, neck-receiving notch in the front
8 wall. The cushioning device includes a flexible cushion
9 constructed of a matrix of formed cushioning pockets
10 separated by seams. The flexible cushion includes opposing
11 proximal and distal extremities and a waist therebetween.
12 The waist is adapted to overlie a segment of the U-shaped,
13 neck receiving notch, the proximal extremity is adapted to
14 overlie and secure a portion of the inner surface of the
15 front wall, and the distal extremity is adapted to overlie
16 a secure portion of the outer surface of the front wall.
